Installer Job Description

Installers at Beck Studios are expected to perform to the highest standards in both installation and safety. Installers should expect to travel up to a week at a time or more in some cases. With the increased demand for our services, we are looking for quality candidates with a passion for theatrical technology. We insist on honest, motivated team players with positive attitudes.

Long hours and travel are required, and we offer top compensation to the individuals willing to step up to the challenge. We are seeking high-caliber individuals with strong character and proven leadership.

If you feel you have these characteristics and want to be a part of our team, we can't wait to hear from you.

What we expect

Your safety, the safety of your coworkers, and the safety of the end-user must be your number one concern.

You will be expected to work at heights and constricted spaces in some cases.

You can expect a typical 40-hour workweek with some long days depending on job access, deadlines, and other factors specific to each project. Installers are expected to be flexible and available to these demands.

Travel is required and a significant part of this position. Beck Studios has a broad reach and travel of a week or more is not unusual. We typically try to have you home on weekends, but this is not always possible.

Responsibilities:

- Installation of counterweight and motorized rigging systems.
- Negotiate with the owner and subcontractors on projects to maintain an efficient, safe, and well-run project.
- Communicate effectively with coworkers and management
- Loading and unloading of equipment
- Completion of daily reports and paperwork.
- Pinpoint and assess issues as they arise, communicate to management, and offer solutions
- Ability to create pull lists from drawings and other in-shop preparations to efficiently complete work in the field.
- Proper care of company property, including tools, vehicles, and equipment.
- Assist in other tasks as needed.

Requirements:

- Experience with the installation and operation of stage equipment
- Counterweight system installation and maintenance
- Motorized rigging systems and maintenance

- At least five years' experience or more
- ETCP Certified or on track to certification (Assistance is provided)
- Knowledge of theatrical rigging practices and procedures
- Basic math skills
- Self-starter and ability to work under minimal supervision
- comfortable working at heights (lifts, grids, ladders, swing stages, etc.)
- Solid problem solver with a systematic approach to installations
- Reads and understands drawings and specifications.
- Ability to negotiate with the owner and subcontractors on projects to maintain an efficient, safe, and well-run project
- Directs and coordinates project activities to ensure project progresses on schedule, on-time completion, and within prescribed budget. Must be able to travel when required
- Agree to and able to pass a background check and drug test
- ability to use standardized safety practices and common sense to complete tasks.
- Ability to lift 50 lbs.
- valid driver's license
-

These skills are not required but are a definite plus:

- Man lift training and certification
- Welding
- AutoCAD
- Experience on construction sites
- OSHA Certification

What we offer:

Competitive wage

- Per hour rate with time and a half over 40 hours per week
- Per diem for travel
- All travel related expenses paid

Vacation and Holidays (including the week between Christmas and New Years off with pay for all employees)

Assistance in professional development and training including:

- OSHA Training
- ETCP Certification
- Manufacturer specific training including ETC, JR Clancy and more.

Medical, Dental, life, and 401K available
